I thought I sent this e-mail out earlier. It should of gone to you prior to one that I just sent. Sorry about that. Anyhow, this one is important since I gave you the link for the VMT software.

Hi Gary,

Here is the link to the website with the VMT (Velocity Mapping Toolbox) information. You can download the program from the site. <https://hydroacoustics.usgs.gov/>

Jason and I discussed the site in detail this afternoon to come up with time estimates. I had too many hours down for post processing, so we cut that down. Jason also gave me the names of the two hydrologic technicians he planned to use to collect the data and they are lower grade that helped as well We are definitely below the 7K now, so that is good news.

I have turned in the cost estimates to Amy to get her approval. Should have something to you tomorrow.

If so, time for the work order and then we are off and running. I am not sure if Kathy is available to process work orders since I think she is out until Feb.
